François Ampe, Teledyne Oldham Simtronics Product Line Manager EMEA speaking of ...

Pack with cable included MX 16 & OLCT 10N O2 or CO2 preconfigured

## Fitted for you 2 products 1 solution

**Specially designed** for applications laboratory, storage, small boiler room, and breweries or battery charging rooms.

**Easy to install** : The MX 16 controller and OLCT 10N detector are delivered O<sub>2</sub> or CO<sub>2</sub> version with a 10 metre cable included (specific RS485 for digital communication). Factory preconfigured, it doesn't require configuration software, connect, detect!

From fermentation to distribution chains, carbon dioxide is one of the most dangerous gases encountered - for example in breweries, cellars: CO<sub>2</sub> being heavier than air (density: 1.52), it tends to take the place of oxygen, thus leading to a risk of anoxia.

With its 3 relays available (AL1, AL2 and fault), a graphic screen that allows you to read values such as:

- Measure Range, gas and detector tag
- Detector address
- Current value with unit and detected gas
- Bar graph with alarm thresholds
  - Detector status (OK, OFF, FAULT)
- MX 16 status information
