

- Worry-free industrial and commercial commissioning for fixed-point monitoring
- Solar-powered solutions
- Wireless solutions
- Employee Instruction
- Custom, on-site evaluation
- Calibration & maintenance programs available

Solutions

Now, the same company that manufactured your quality gas detection equipment can provide installation services. 3M Gas & Flame Detection Start-Up and also Commissioning Services can have your gas-detection program up and running quickly while eliminating the need for you to reassign employees or search for specialized technicians and contractors to perform troubleshooting procedures.

Our Start-Up and Commissioning Services are available to you on-site, for 3M Gas & Flame Detection fixed-point monitoring systems, solar and wireless applications.

3M Gas & Flame Detection's expertly trained technicians ensure that your systems are installed correctly and in proper operating order; we even provide the necessary training so that employees are never left guessing about proper maintenance and instrument calibrations.

Our Commissioning Services are easily customized for your company's specific needs – giving you the flexibility to create a program that works with your employees, resources, and budget.

And, of course, you also have the option of adding other convenient 3M Gas & Flame Detection maintenance, calibration, and on-site services to your gasdetection program.

Contact us, or your local representative for a customized quote for your specific Start-Up and Commissioning needs.

Fixed Systems - Turnkey Services

3M Gas & Flame Detection offers complete, custom solutions for flame and gas detection needs. Our team of engineers works directly with customers from system conception, design, installation, commissioning and servicing.

Each application is optimized for performance and cost. Each control system is fully documented and delivered ready for installation.

Full documentation is included with wiring diagrams, system layout, customized user manual, test reports, control unit programming, and user manuals for each flame detector and gas monitor. Our on-site service and commissioning guarantees that the system is up and running properly upon completion. Other after-sales services such as quarterly calibrations of the transmitters is also available from 3M Gas & Flame Detection.
